

The easy way to promote your care business on the web!

A complete website package

Experienced in working in the social care sector

We understand your needs

In association with the Independent Providers Forum (IPF), we have been supporting the care sector in East Sussex and Brighton & Hove for many years, helping residential and domiciliary care associations and care providers promote their services on the internet.

We understand the organisational and operational issues in running a care business and have considerable experience in marketing and promoting their services.

We are proud to have been chosen to design and maintain www.carefinder.org.uk. This website is now used extensively by the public to help them find the right care for their needs.

A website is a powerful tool, your customers are making purchasing decisions long before you may ever have a chance to meet them, so it is essential that the web becomes a key part in your sales promotion activity. This website package has been specially prepared to help you to promote your care services on the internet easily, quickly and without any fuss.

If you already have a website then we also offer a FREE website audit, we will check that it is working effectively and offer our professional advice on ways in which it can be improved.

Working in association with

Building partnerships in Health and Social Care

A professional website tailored to your care needs.
